### SUMMARY

Developer with an engineering mindset. After over a decade of precision-driven problem-solving in the automotive sector, I now apply that same meticulous attention to detail to software development. Proven experience delivering mobile and web applications (GesiFlot, nastymur.com) and managing custom self-hosted infrastructure. Actively integrates AI tooling (Claude Code, Ollama, MCP) into the development workflow. Looking to bring my analytical skills and adaptability to a strong engineering team.

### PROFESSIONAL EXPERIENCE

**Development Team**  
**GesiFlot**

Murcia, Spain  
2025

- Developed Android mobile application using Android Studio and Java.
- Designed UI/UX flows and integrated REST APIs for fleet management features.
- Diagnosed and resolved bugs across the Android/Java stack; maintained FTP/SFTP infrastructure for client file delivery.
- Built and signed APK releases for internal distribution.
- Acted as technical point of contact with clients, gathering requirements and communicating progress.
